

Panagiotis Boskos

Game Designer

Very interested in creative industries, problem-solving, and programming in general. Currently, looking for a role where I can learn modern technologies that will challenge me in a way that makes me better and more efficient as a developer or Designer. I love collaborating with people because I firmly believe that teamwork brings the best results.

Experience

○ 2022 - 2022

Imperial Dynamics | Ηπείρου 1, Θεσσαλονίκη 546

Game Designer

As a game designer at Imperial Dynamics, I took on a pivotal role in designing a 2D space shooter game. My responsibilities included designing the game's user interface and user experience, creating and balancing game systems and mechanics, and ensuring that the game was fun and engaging for players. In addition to my design work, I also contributed to the implementation of these elements by writing code alongside the lead developer. My expertise and leadership were essential to the success of the project, and my contributions helped create a memorable and enjoyable game for players to enjoy.

○ 2021 - 2021

Cactus | Πλ. Μοριχόβου 1, Θεσσαλονίκη 546 25

Web Designer

As a web designer at Cactus, I had the privilege of working closely with the lead developer to design and develop websites ranging from small to large scales. My primary focus was to ensure that the sites were highly user-friendly and easy to navigate. I was always conscious of the importance of maintaining simplicity and minimalism in the design process. This role taught me a great deal about the benefits of minimalist design, and how these principles could be applied to game design. I am proud to have contributed to the development of many successful websites and learned valuable skills that I can carry forward in my career.
